Weekly Coal Production

Production for Week Ended:
August 1, 1992

Energy
Information
Administration

Summary

U.S. coal production in the week ended August 1, 1992, as estimated from railroad car loadings by the Energy Information Administration, totaled 18 million short tons. This was about the same as in the pre-

vious week and in the comparable week in 1991. Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 7 million short tons.
